

Path to Success: bridging a critical education gap

Jessica is graduating this year. She's had an amazing college experience, giving her the confidence and knowledge she needs to take on the world. But as graduation draws near, Jessica is getting nervous. She knows she'll have to start repaying her student loans and taking responsibility for her own finances. Even with her education, though, Jessica realizes she doesn't know much about personal finances. What can she do? Where can she turn for help?

Jessica isn't alone. Millions of graduates enter the working world each year, armed with lots of valuable knowledge, but little or no real-world financial experience. Fortunately for Jessica — and for millions of others — many of the answers they need are at their fingertips. Recently, Navient introduced Path to Success, a series of brief, free, and interactive modules covering key financial topics like these:

- Federal student loan repayments
- Savings and investments
- Payment types and credit cards
- Credit scores and reports
- ... and many new modules coming soon

Path to Success is available to anyone — not just Navient customers — on any web-enabled device. To access Path to Success, users visit Navient.com/path and create an account. It's easy and confidential.

Navient leads all federal loan servicers in helping borrowers avoid default. Path to Success is part of Navient's ongoing efforts to educate and engage borrowers, equipping them with the information and confidence they need to make smart, informed decisions.

Path to Success Learning Modules:

The image shows a horizontal row of four interactive learning module screenshots. Each module is titled "POWERED BY EVERFI" and features the Navient logo. The first module, "Student Loan Repayment", displays a table comparing four repayment plans: Standard, Graduated, Income-Based, and Pay As You Earn. The second, "Savings & Investments", shows a "BUILD A DIVERSE PORTFOLIO" interface with a "High-Risk Portfolio" gauge and buttons for Stocks, Bonds, and Mutual Funds. The third, "Payment Types & Credit Cards", compares "THE PASSPORT CARD" and "THE VICTOR CARD" with a "Which Pays the Lowest APR?" comparison. The fourth, "Credit Scores & Reports", illustrates "HOW IS A CREDIT SCORE CALCULATED?" with three credit scores: Experian (642), Equifax (657), and TransUnion (651). Below the screenshots are four purple buttons with white text: "Student Loan Repayment", "Savings & Investments", "Payment Types & Credit Cards", and "Credit Scores & Reports".
